

**DANVER**  
INNOVATION IN CABINETRY

## STAINLESS STEEL CABINETRY

### Engineered for highest quality & durability...

European frameless design full overlay cabinets are fabricated with industrial grade 20-gauge stainless steel. A quick look inside reveals the craftsmanship as the interior is void of any hardware and screw heads. Fine points of the cabinets include concealed stainless door hinges, "sturdy" solid core doors, trash pullouts, fixed and sliding shelves, self-closing drawers and leveling legs.

Danver also offers the widest range of storage cabinets, grill bases, side burners and sink bases in the industry. Cabinetry is available in standard 3" widths from 12" to 36".

### Engineered for ease of assembly...

The "easy-alignment" design system allows for quick, precise installation with less labor than typical indoor cabinetry. Each cabinet stands alone and has quick connect features. Access holes in key locations for plumbing and electrical installation eliminates the need for drilling, cutting and boring. A screw gun, long screwdriver and the easy-to-follow instructions will ensure a professional installation the very first time.

### Engineered for the designer...

The leader in stainless steel cabinetry also has an eye for style. The stainless doors, drawer fronts and drawers come with a #4 brushed vertical grain to provide a rich contemporary look. These modular cabinets also provide designers and homeowners with infinite flexibility in design configurations. They can also be designed with stucco and stone to create beautiful and unique outdoor kitchens. The industry's most extensive line offers cabinetry to accommodate

appliances that extend from standard grills to "steakhouse" infrared grills, smoker ovens, wok burners, warming drawers, under-counter refrigerators, sinks, kitchen provisions and storage for pool equipment and hoses. Today's outdoor kitchens allow cooks to prepare food outdoors rather than continuously running in and out of the house for ingredients.

Added to the endless design capabilities are a variety of door styles that guarantees that every kitchen will be a "one-of-a-kind". Danver stainless kitchen cabinetry is warranted to hold up for years under the most severe weather conditions... or demanding chefs.

## WALL CABINETS

### Engineered for functionality...

Danver wall cabinetry displays a sleek contemporary look whether they are complementing an indoor or outdoor kitchen. Again the cabinets offer a variety of widths in 3"

increments, from 12" to 36", for ease of design. Stainless doors have a solid core that provides additional "heft" and stability. Select from five different styles. Open frame doors may also be prepped for glass.

## DOORS

(available separately)

### Engineered for beauty and design...

Doors and drawer fronts are constructed of commercial stainless steel with a vertical #4 brushed finish.

For outdoor use, a weatherproof PVC gray foam slab is screwed to the door for a "sturdy" solid feel.

For indoor applications, the core of the door is Ultralite MDF with an aluminum

1-door, 2-drawer and 3-drawer refrigerators available

laminate backer to match the stainless finish and perform exactly like wood doors on the cabinetmaker's manufacturing floor. Custom sizes are available and "frame only" fronts are prepped for glass, teak or specialty inserts. A rubber gasket is supplied for glass.

Enjoy the advantage of a no minimum order policy. Order "kitchen by kitchen" and the lead time is only 3 weeks.

## CARTS

### Engineered for convenience...

For entertaining or extra workspace, Danver kitchen carts are the "portable answer" whether you're working indoors or at the barbecue.

Constructed of commercial grade stainless steel, these mobile countertop workspaces offer the flexibility to be in the center of prepping or

entertaining or "tucked" out of sight when not required. There are two sizes:

The Kitchen Cart measures 30"W x 22"D x 34"H while the smaller "Cocina" model is 27"W x 18"D x 34"H.

Both models are available with or without stainless steel tops.

## FLOATING SHELVES

### Engineered for the contemporary look...

Uniquely designed and very sturdy, the floating shelves are completely finished from every angle. An internal bracket is attached to the wall and the stainless steel shelf fits around the bracket and locks into place conveying the "floating" appearance. The shelves are 10" deep x 2.5" thick and come in standard widths of 18", 24", 30", 36", 42", 48", 60" and 72".

## Engineered... for leisurely family dining and gracious entertaining

Turn that dream into reality by transforming the “out-of-doors” into your very own private entertainment center that also features your culinary favorites. Create the perfect setting that’s as well appointed, warm and inviting as the interior – that special getaway where family and friends enjoy leisurely gatherings and memorable times.

From innovation to installation, Denver’s complete line of outdoor kitchen cabinetry combines advanced design and refined

features to provide the storage and organization needed to complement your outdoor kitchen. No matter what your layout or blueprint requirements entail, Denver is “design friendly” with cabinetry in three inch increments from 12” to 36” in width. And grill base cabinets to fit every major manufacturer’s grill.

This is the perfect opportunity to take to the outdoors in style with the beauty and durability of quality stainless steel cabinetry from the industry leader.
